

TEST EQUIPMENT CALIBRATION PROGRAM

Track and maintain calibration and service records for equipment/assets
Automatically flag when due for calibration or service

Examples:

Lifting equipment
Machines
Gauges
Torque wrenches
Micrometers
Test equipment
Welding machines
Compressors
Multimeters
Lab equipment
Chain blocks
Hoists
Vehicles
Forklifts

Date	Certificate No / Reference	Type
14/10/2016	CH7288	PDF
31/10/2017	CALIBRATION CERT CH8111	PDF
30/10/2018	TW1 - CALIBRATION CERT CH8456	PDF
19/02/2019	TW2 - CALIBRATION CERT CH8471	PDF
19/02/2019	TW2 - CALIBRATION CERT CH8471	PDF

T.E.C. \$690 plus GST*
(*Licensed for 1x terminal / seat)

Some of the many features of T.E.C.

- Displays service and/or calibration due dates for all equipment/assets
 - Record Ser No, manufacturer, model, location, tolerance, category and use for each item listed
 - Track, record and monitor service and/or calibration history for each item
 - Set different service and/or calibration intervals for the same piece of equipment/asset (eg Service every 120 days but calibrate every 365 days)
 - Generate Test Certificates for clients/customers that can also reference a calibrated item from your Equipment List
 - Automatic report is generated at T.E.C. startup identifying any items that are due, or past due, for calibration and/or service
 - Original calibration certificates and documents can be scanned, or imported, directly into the program and stored against the item for audit purposes and future viewing & printing
- Note:** We can import data from existing Excel® spreadsheets
